Bright TV

Project Plan

01 Data Source

- Download MS Excel dataset
- Split sheets into 2 tables
- Load tables on Databricks - user profiles and viewership

02 Data Processing

- Run different queries on Databricks to explore the data
- Final data aggregation on Databricks
- Final check on final table
- Export final table to MS Excel

03 Data Visualisation

Create pivot tables, graohs and charts on MS Excel for visualiasation and insights. Alternatively, create dashboards on PowerBI or Looker Studio.

04 Extracting Insights

Extract and explain insights from the tables, graphs and charts created. Add everything to presentation deck.

05 Presentation

Presenting final insights to the Customer Value Management team - 20min presentation.

06 Refinement

Collect feedback from the CVM team and refine the insights if necessary (if anything was missed).
